***Cutting Edge Networked Storage and Leading Geographic Information Systems (GIS) Company Esri Collaborate to Deliver the ArcGIS for Imagery Data Management Appliance***

***EL CAJON, CA - (PR Newswire) – July 8, 2013 – Cutting Edge Networked Storage, [www.cuttedge.com](http://www.cuttedge.com), is now manufacturing the Windows based **ArcGIS for Imagery Data Management Appliance** for Esri.***

Cutting Edge Networked Storage, the manufacturer of Esri's Data Appliance for ArcGIS and Esri's popular Windows based Servers Preloaded with ArcGIS for Server has added Esri's new ArcGIS for Imagery Data Management Appliance to the family of Esri products built by Cutting Edge. This appliance is a scalable platform for loading, managing, and disseminating imagery across an organization and provides access to both dynamic and cached imagery services powered by Esri's ArcGIS technology.

This solution includes server and storage hardware in addition to Esri's Professional Services which includes setup, installation and the configuration of an image mosaic dataset of the customer's supplied imagery.

"Cutting Edge is very pleased to see our relationship grow with Esri and we are committed to providing customizable solutions that are easier to use and meet the needs for both secure and scalable high performance computing within an organization's GIS," said Cutting Edge CEO, Michael Ehman.

Dean Garner, Esri's Hardware Solution Sales Manager, said "With the ArcGIS for Imagery Data Management Appliance, you can quickly ingest, catalog, and publish imagery from a wide range of sensors and platforms and then disseminate imagery as both files and web services to share imagery analysis results. This new appliance provides a high performance purpose-built combination of hardware, software and imagery available to the GIS community and we are pleased to have Cutting Edge Networked Storage as the manufacturer of this new solution."

## **About Cutting Edge Networked Storage**

Cutting Edge Networked Storage has developed fault tolerant and fully redundant high performance open standards and open source storage systems and storage appliances for government and enterprise-level customers since 1992. From fixed low cost storage solutions, customized data protection and unified storage management solutions and secure computing consulting, Cutting Edge is an industry leader for iSCSI, IP SAN, Networked Attached Storage (NAS) and Direct Attached Storage (DAS) products including the new Edgeware ZFS Storage Solution. For more information please visit [www.cuttedge.com](http://www.cuttedge.com) or contact Cutting Edge at 619-258-7800, Ext. 210 or review our solutions during the Esri UC 2013 booth #616.

## **About Esri**

Since 1969, Esri has been giving customers around the world the power to think and plan geographically. The market leader in GIS technology, Esri software is used in more than 300,000 organizations worldwide including each of the 200 largest cities in the United States, most national governments, more than two-thirds of Fortune 500 companies, and more than 7,000 colleges and universities. Esri applications, running on more than one million desktops and thousands of Web and enterprise servers, provide the backbone for the world's mapping and spatial analysis. Esri is the only vendor that provides complete technical solutions for desktop, mobile, server, and Internet platforms. Visit us at [esri.com/news](http://esri.com/news).
