CUTTING EDGE NETWORK STORAGE ANNOUNCES EDGEWARE ADAPTABLE UNIFIED STORAGE

Low cost, highly flexible storage that adjusts to multiple modes of operation.

EL CAJON, CA. – (BUSINESSWIRE) – April 4, 2011 – Cutting Edge Network Storage, www.cuttedge.com, a leading provider of Unified Data Storage Solutions announced today the availability of EdgeWare AUS (Adaptable Unified Storage) product line. EdgeWare AUS provides a flexible, easy to use unified storage platform for price conscious customers that adapts to the demanding throughput requirements to support GIS (geographical information systems) and video surveillance systems.

“EdgeWare AUS allows clients to connect to their storage resources via a broad range of protocols like CIFS, NFS, FTP and iSCSI, and includes business and mission critical features customers require like Snapshots and Backups, Local and Remote Synchronous and Asynchronous Replication, High-availability and many more”, said Deborah Inman, President, “EdgeWare AUS Storage Manager allows customers to re-purpose existing legacy storage to minimize total cost of ownership.”

EdgeWare AUS adjusts file level and block level storage internals to maximize efficiency and performance for demanding high throughput applications. EdgeWare optimizes internal storage components to maximize the system for demanding use cases. The clean user interface provides simple to understand management concepts.

“EdgeWare meets the most rigorous security requirements by providing STIG support.” said Deborah Inman, “EdgeWare is installed in the DoD/Government space with TS-SCI rated support personnel.”

EdgeWare is a scalable product line for the price conscious customer. EdgeWare Standard is a cost effective Unified Storage solution providing basic applications, and retails for \$6,995 for an 8TB solution. EdgeWare Enterprise is a full featured Unified Storage solution providing robust fault tolerant and availability features, and retails for \$20,695.00 for a 24TB solution.

About Cutting Edge Networked Storage

Cutting Edge Networked Storage has developed fault tolerant and fully redundant high performance open standards and open source storage systems and storage appliances for government and enterprise-level customers since 1992. From fixed low cost storage solutions, customized data protection and centralized storage management solutions to Linux development engineering, Cutting Edge is an industry leader for iSCSI, IP SAN, Network Attached Storage (NAS) and Direct Attached Storage (DAS) products.
